

D203.suu ALBANY, 18 APRIL 1997

This second make-over of [D203](#) uses the same excellent audio upgrade source as [D203.su](#) while making significant video improvements. Thus, this time around, expect fewer assertive special effects, more patching over disruptive roof and floor passages and the welcome removal of excess applause-only filler which reduces overall running time from 116 minutes to 111. Previous minor distortion problems also now fixed. For film and performance detail see [D203.su](#) review. This may not be the best of Bob, but it's not bad either and, in parts (Flood through to You Go Your Way, Shooting Star, RDW) just fine.

THANKS G

STARS Another labour of love from Ace Industries, rewarding us this time with a DVD notably more visually pleasing than its former self (so, if you quite liked [D203.su](#), well worth a punt). A solid four.
